VOL. XVI. NO. 87.

THE BLAIRMORE ENTERPRISE THURSDAY, SEPTEMBER 10, 1925

COLEMAN CARNIVAL PASS' BIGGEST EVENT

The biggest event ever pulled off in the Crows' Nest Pass, exceeding even the big Elks' Carnival at Blairmore, a couple of months ago, was the carnival staged at Coleman on Friday and Saturday nights last for the benefit of the Swimming Pool Fund.

The carnival opened at 7 p.m. on Friday and that night we understand upwards of \$1400 was taken in. On the second night, it was estimated that fully five thousand people attended and the gross receipts for the event were brought up to over six thousand dollars, which will net some four thousand dollars towards the swimming pool objective.

Various stalls were operated along lines similar to those introduced in Blairmore, and each and all were exceedingly well patronized. The blanket stall seemed to be the greatest attraction and upwards of \$1400 was handled in this department alone. The ham and bacon stall became sold out over and over and the trade there fully doubled expectations. House- house, the ball tub, ringing the coins

and prizes were popular.

The dancing pavilion was well patronized and the real surprise of the evening came when Scotchmen crowded the pavilion for the Scotch pipers' dance. Most of them have been given back their fee since so as to ensure happiness in the families affected.

The draw for a choice between a Ford Sedan and a Star Touring Car took place at 11 p.m. Mr. Alex. Morrison in charge. A little girl from the audience volunteered to make the draw and the ticket 1236 fell to the lot of Nick Sakoff, a Russian resident of West Coleman. Russell Vincent, also of West Coleman, was declared winner of the washing machine.

In spite of the views expressed in the Coleman paper, prior to the carnival, as to the "opposing attitude" of the citizens of Blairmore, Coleman people are now satisfied that the charge was entirely unjustifiable. Blairmore people and Blairmore dollars were there and helped very largely towards the success of the carnival.

The Conklin & Garrett shows are this week located at Fernie.

COLEMAN SCHOOL FAIR IS HUGE SUCCESS

The annual school fair held at Coleman arena on Thursday of last week was attended by much success. The spacious arena afforded ample opportunity to display all articles to advantage with lots of room for the public to pass around and view them.

The floral display was beautiful, asters, poppies, sweet peas etc., making a beautiful and fragrant display. Vegetables were also high in quality and the judges were surprised that such fine stuff could be grown around the mountains. The children's hand work was excellent. Many clever articles in good variety were on exhibition.

The judges were: Miss Hall, Miss Reid, A. Weston, J. Walker, G. G. Gienhauser and Inspector Bremner.

A sports programme for the kiddies was carried out on the grounds near by, and a baseball game between central and west Coleman pupils brought the sports to a close. In this game the westerners lost 2 to 8.

SECURE THREE BIG TROPHIES

Carl Smith and party, who had been hunting big game in the region northwest of Gould's Dome, returned to town on Sunday afternoon last with three sheep, big fellows. The largest of the three was a veteran of some sixteen to twenty years and showed signs of having had many battles for supremacy. The horn of the butt measured 17 1/2 inches around, believed to be the largest ever brought down from the southern Canadian Rockies. The others were fine specimens of three and four-year-olds. The party consisted of Carl Smith, Floyd Smith, Myrcia Proven and Masters Robbins and Stewart. They report having seen lots of game.

Mr. G. F. Johnson, formerly of Fernie and until recently auditor for the Town of Blairmore, recently had a brand new car badly smashed when a woman motorist collided with it. Damage amounted to about \$300.

SPECIAL MEETING OF "HIRING AND FIRING SQUAD"

A special meeting of the Blairmore School Board, now generally considered a genuine hiring and firing squad, was held at the school-house last night. Chairman Dutil and members W. H. Chappell, F. Wheatley and W. A. Beebe, and Secretary Gresham being present.

The chairman announced that the purpose for which the meeting was called was to consider the withdrawal of Miss Mitchell, one of the new appointments. In Miss Mitchell's request for withdrawal she gave as her reason that only since receiving the appointment had she been made aware of the actual conditions existing here, which were responsible for the vacancies on the staff. Nevertheless, however, she stated her willingness to live within her contract and to teach if necessary for the balance of the thirty days covered by her notice given around September 1st. Upon motion by Mr. Beebe, the resignation of Miss Mitchell was accepted, "effective immediately." The chairman and mover voted for the motion, Mr. Wheatley declining to vote, stating that as he did not sanction the appointment, he would take no action in the matter.

The application of Miss Mildred McDonald, of Creston, B.C., was then considered. Miss McDonald desired a position as primary teacher, in which capacity she claimed to be a specialist of six years' experience. Her communication had already been replied to by the chairman, who advised her that Blairmore was "black-listed," and offered her a grade position.

Motion by Beebe that application of Miss McDonald as grade teacher, at a salary of \$1100 per annum, be accepted, to take effect at once, was adopted.

Chairman again stating that this was the business for which the meeting was called and asking for a motion to adjourn, Member Wheatley interrupted and asked if the secretary had received communication from the Department of Education in reference to the school being kept closed illegally. The reply was "no." Mr. Wheatley then produced a telegram as follows:

"Edmonton, Alberta, September 8, 1925.

Frank Wheatley, Blairmore, Alberta.

Chairman of Blairmore Board advised by letter dated September 3rd, that Board could not legally keep school closed after September 1st.

J. T. ROSS,

Deputy Minister."

While both the chairman and secretary practically denied any knowledge of the communication, Mr. Wheatley claimed that such letter should be in the hands of the secretary or the chairman of the Board, and demanded that it be produced right now.

The chairman stated that letters of this description would be produced at the next regular meeting of the Board, which would be September 25th, meaning that the school will be either closed or operated illegally till that time or for the full month of September. In other words, if the Board is in possession of such information from the department and fails to act thereon, they are law-breaking, and as lawbreakers are subject to dismissal upon proper action taken by the district inspector or two or more representative ratepayers of the district.

Mr. Wheatley charged that the Board today was a one-man board and based his contention on the grounds that the property of the board, such as correspondence, as above referred to, was being withheld by the chairman.

The Dominion hotel at Trail, B.C., was totally destroyed by fire at August 29th.

BELLEVUE FLOWER SHOW

The annual exhibition under the auspices of the Bellevue and District Horticultural and Industrial Club, took place in the Bellevue arena on Monday, Labor Day. In every way, number of entries, quality, etc., the show surpassed anything previously staged.

A brass band was in attendance during the afternoon.

In connection with the show, a sports programme was carried out on the athletic grounds.

The attendance at the show and sports was the largest in the history of the Club.

The regular monthly competition of the ladies of the Blairmore Golf Club will be held on Saturday, September 12th.

A full list of events and prize winners of the Bellevue and District Horticultural and Industrial Club 1925 show and sports is being compiled and will appear in a later issue of The Enterprise.

It is very interesting to note that some of those favoring the dismissal of the old efficient staff of Blairmore teachers and the bringing in of efficiency are planning on sending their own children to another district to attend school.

NEW PRINCIPAL ARRIVES

Mr. McPherson, appointed by the Blairmore School Board to replace Mr. Conway, said to be deposed, arrived here this morning.

LEVITT IS CONFIRMED PRESIDENT DISTRICT 18

DRUMHILLER, Sept. 8.—James Conway, district board member of the United Mine Workers of America, received a telegram Friday from John Lewis, international president of the U.M.W.A., advising that everything had been arranged and O.K'd by him turning over the direction of affairs in district 18, U.M.W.A., to president Robert Levitt and his colleague, Rod McDonald, international board member.

Mr. Levitt is therefore officially confirmed in his seat as directing head of district 18, U.M.W.A.

New appointments to the Dominion Senate include Hon. W. A. Buchanan, managing director of the Lethbridge Herald, and Mr. P. E. Lessard, of Alberta.

ANNOUNCEMENT

Mrs. H. Ryan, of Hillcrest, wishes to announce the engagement of her daughter, Doris Alexandra, to Mr. James Gordon, junior, of Hillcrest, the marriage to take place in September at Toronto.

W. A. Hamilton has been appointed police magistrate at Lethbridge, to succeed Edward N. Barker, who has resigned and is going to England to live. Mr. Hamilton was city superintendent of the Lethbridge schools for ten years, resigning in 1915 to engage in farming. He has been an active U.F.A. worker and has been a provincial director and is now the district secretary.

BARRE, SON OF KAZAN
by
James Oliver Curwood
A LOVE EPIC OF THE FAR NORTH
Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Will, the War Dog, is an Adaptation of This Story

SYNOPSIS
Barre, the young wolf-dog, wandering in the wilderness, came upon a colony of beavers. He tried to make friends with them, but they were afraid of him. He then saw a pack of wolves and was driven away from them. He was then attacked by a pack of wolves and was driven away from them. He was then attacked by a pack of wolves and was driven away from them.

CHAPTER VII.—Continued.
For a quarter of an hour Barre watched him while he knocked fish out of the pool. When at last he stopped, there were twenty or thirty fish among the stones, some of them dead and others still flopping. From where he lay flattened out between the two rocks, Barre could hear the crunching of flesh and bones as the bear devoured his dinner. It sounded good, but the fresh smell of fish filled him with a craving that had never been roused by crayfish or even partridge.

Twenty seconds after the last of Wakayoo had disappeared in a run of the creek, Barre was under the broken balm. He dragged out a fish that was still alive. He ate the whole of it, and it was delicious.

Barre now found that Wakayoo had solved the food problem for him, and this day he did not return to the beaver pond nor the next. The big bear was fast asleep, and Barre continued his feast.

For a week he continued to eat as contentedly as possible. And then came the break—the change that was destined to mean as much for Barre as that other day, long ago, had meant for Kazan, his father. It was the man-bear in the edge of the wilderness.

This change came on the day when, in trotting around a great rock near the waterfall, Barre found himself face to face with Pierrot, the hunter, and Nepeese, the star-eyed girl who had shot him in the edge of the clearing.

It was Nepeese whom he saw first. It had been Pierrot he would have turned back quickly. But again the blood of his father was routing strange romblings within him. Was it like this that the first woman had looked to Kazan?

Barre stood still. Nepeese was not more than twenty feet away. He was on a rock, tall in the early morning sun, and was brushing out her wonderful hair. Her lips parted. Her eyes shone in an instant like stars. One hand remained poised, weighted

Want Canadian Governor-General
Vancouver Native Sons of Canada have Canadian for President of the Vancouver Assembly, Native Sons of Canada, voted on record as favoring the appointment of a Canadian to the office of governor-general. Sir James Aikman, Sir Robert Borden, Sir William M'Whe, Hon. The Hon. Sir Arthur D'Almeida, Sir Louis Gouin, and Sir Hon. W. S. Fielding, were suggested as suitable for the position.

Barre, the young wolf-dog, wandering in the wilderness, came upon a colony of beavers. He tried to make friends with them, but they were afraid of him. He then saw a pack of wolves and was driven away from them. He was then attacked by a pack of wolves and was driven away from them.

with the jet of moss. She recognized him. She saw the white star on his breast and the white tip on his ear, and under her breath she whispered "villain!" "The dog-pup!" It was the wild dog she had shot and thought had died! The evening before Pierrot and Nepeese had built a shelter of balsam behind the big rock, and on a small white plot of sand Pierrot was kneeling over a fire, preparing breakfast while the Willow arranged her hair. He raised his head to speak to her, and saw Barre. In that instant the spell was broken. Barre saw the man-bear as he looked on his face. Like a shot, he was gone.

Scarcely a wimper was he than Nepeese. She was standing there, looking at him, and he was looking at her. He was looking at her, and he was looking at her. He was looking at her, and he was looking at her.

Barre darted to one side and ran for the open meadow. Wakayoo did not stir. Barre went past him, and more than he had been a bird or rabbit. Then came another breath of air, heavy with the scent of man. This, at last, put life into him. He turned and began lumbering after Barre, his head down, his ears pinned back, his eyes fixed on Barre.

Barre saw him coming, and thought it was pursuit. Nepeese and Pierrot came over the slope, and at the same instant they saw both Wakayoo and Barre.

Where they entered into the grassy dip under the rock walls, Barre turned sharply to the right. Here was a great boulder, one end of it tilted up to the earth. It looked like a splendid hiding place, and Barre crawled under it.

But Wakayoo kept straight ahead into the meadow. (To be continued)

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother's Remedy. Worms exterminator, an excellent remedy.

Gossiped Right
A crowd of small boys was gathered about the entrance to a circus tent. A man standing near watched them for a few minutes. Then he walked up to the ticket collector and said with an air of authority:

"Let all those boys in and count them as they pass."

The ticket collector did as requested, and when the last one had passed in he turned and said: "Twenty-eight, sir."

"Good," said the man, smiling, as he walked away. "I thought I guessed right."—Los Angeles Times.

yards ahead of her Pierrot gave a warning shout. Barre had turned. Almost in the same breath, he was tearing over his back-trail, directly toward the Willow. He did not see her in time to stop or swerve aside, and Nepeese flung herself down in his path. For an instant or two they were together. The girl felt the smother of her hair, and the clutch of her hands. Then she squirmed away and darted again toward the blind end of the canyon.

Nepeese sprang to her feet. She was panting and laughing. Pierrot came back wildly, and the Willow pointed beyond him.

"I had him—and he didn't bite!" she said, breathing swiftly. She still pointed to the end of the canyon, and she said again: "I had him—and he didn't bite me, Nootaw!"

That was the wonder of it. She had been reckless—and Barre had not bitten her! It was then, with her eyes shining at Pierrot, and the girl fading slowly from her lips, that she spoke softly the word "Barre," which in her tongue meant "the wild dog," a little brother of the wolf.

In and out among the rocks Barre sought swiftly for a way of escape. It was a beautiful spot. On all sides, except the one by which he had come, there was a box, or cup of the wall, fifty or sixty feet above, which opened into a natural prison above an area in extent. It was a beautiful spot. On all sides, except the one by which he had come, there was a box, or cup of the wall, fifty or sixty feet above, which opened into a natural prison above an area in extent.

From it there was no escape, except in the face of his rifle. He called to Nepeese as he saw Barre entering it, and together they climbed the slope.

Barre had almost reached the edge of the little prison-meadow when suddenly he stopped himself so quickly that he fell back on his haunches, and his heart jumped up into his throat.

Full in his path stood Wakayoo, the huge black bear!

Barre darted to one side and ran for the open meadow. Wakayoo did not stir. Barre went past him, and more than he had been a bird or rabbit. Then came another breath of air, heavy with the scent of man. This, at last, put life into him. He turned and began lumbering after Barre, his head down, his ears pinned back, his eyes fixed on Barre.

Barre saw him coming, and thought it was pursuit. Nepeese and Pierrot came over the slope, and at the same instant they saw both Wakayoo and Barre.

Where they entered into the grassy dip under the rock walls, Barre turned sharply to the right. Here was a great boulder, one end of it tilted up to the earth. It looked like a splendid hiding place, and Barre crawled under it.

But Wakayoo kept straight ahead into the meadow. (To be continued)

Cuticura Baths

Comfort Baby's Skin

The absolute purity and delicate moderation of Cuticura Soap makes it ideal for baby's tender skin. Used daily, with touches of Cuticura to the skin, it keeps the skin smooth, clear and healthy. Cuticura, Talcum is so soft and cooling, ideal for baby after a bath.

Small Size Free by Mail. Address: Cuticura Soap Co., P.O. Box 100, New York, N.Y.

Comet Had Several Tails

Six Diverged From Head of One Discovered in 1743

It is reported from Germany that photographs taken of the comet Oriskany show that it has now developed a second tail. This tail cannot be seen with a telescope. The primary tail also, is, to all intents and purposes, merely a photographic object, only the vaguest indications of it being perceptible to a telescope. A duplicate, or even a multiplicity, of tails is by no means an uncommon occurrence, although it is not often seen in objects as faint as the present comet.

The great comet of 1743, discovered by Klinkenberg, had six tails diverging like the ribs of a fan from his head. In some comets the tails are curved, in others they are straight, while often curved and straight tails exist together.

KEEP BABY WELL DURING HOT WEATHER

Every mother knows how fatal hot summer months are to small children. Cholera infantum, diarrhoea, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps baby's little life in her hands, feels that she is doing her duty.

The occasional use of the Tablets prevent stomach and bowel trouble, or if it comes, the Tablets bring the baby safely through. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., New York, N.Y.

Not All Friendliness
Famous Author's Concern For Young Beginner Included Himself

A famous author and an ambitious beginner arrived together at a small hotel. On the second day of their stay the author took the landlady aside, and said: "I want to talk to you about this young friend of mine. He is new to the writing game, and makes very little money. I wish you'd make his bill as small as possible."

The landlady, grateful at the great man's friendly attitude, promised to do as requested, until the author added: "By the way, don't let my bill be any bigger than his. It would humiliate him. Boys like that are extremely touchy."

Internally and Externally it is Good.
The crowning property—Dr. D. Thadley's Electric Oil—that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colds and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Cure For Social Cancers

Better Discipline and Higher Ideals For the Youth of the Land

We are convinced that the best cure of most of our social troubles is to be applied in the childhood of the nation, in the formation of self-discipline, self-respect and right doing and in the acquiring of ideals and standards of conduct.

In the boy, Scouts under good leadership, the one of the best counter agents to evil influences. The wider Americans spread the foundation of sound childhood, healthy exercised, self-disciplined and convinced that the right thing is the strong thing, not the weak, the more we shall be getting rid of our social cancers—Child Cancers.

A little girl, on arriving late at school for the first time, was scolded by her teacher, and told to write a composition on "Punctuality."

After a strenuous quarter of an hour she produced the following:

"Punctuality is knowing where to make stops."

A Canadian Explorer

Major Burwash Starts On a Long Patrol of Northern Points in Canada

When Amundsen made his spectacular flight to the North Pole—or to some point in its vicinity—the whole world was interested. When the MacMillan expedition, thoroughly outfitted and equipped in every way for its work of Arctic exploration set out, every item of news about the trip is featured in the press of the world.

Less is heard about this trip & Canadian is making into the far north. The magazine published by the Interior department at Ottawa gives some particulars about the little advertised adventure on which Major L. J. Burwash, of the government service, has embarked.

Major Burwash has started on a long patrol from the mouth of the Mackenzie River to Hudson's Bay. He goes alone on his long trip, expects to be two years on the journey, and to live with the Eskimos he encounters on the way. He will study the country, estimate the population, make astronomical and meteorological observations, and take notes on bird, animal and floral life. He expects at the end of two years to come out either at Repulse Bay or Chesterfield Inlet, as convenience at the end of the trip may determine.

There is no great publicity about the expedition, in that of Major Burwash. "Nor is it unusual for men in the Canadian service to make these long and arduous northern journeys. Men of the department of the interior are forever doing it, as are men of the Mounted Police. There is scarcely an annual report of the Mounted Police issued that does not contain a brief but graphic report of a trip covering long months and thousands of miles on foot, by canoe, dog-sled and snowshoe."

These trips are, often made by men of action, not writers, or some wonderful books of travel would appear.—Regina Leader.

London Zoo Loses Old Exhibit

White Bear Has Been Entertaining
Feature For 22 Years

Sam, the great white bear which has been one of the most entertaining features of the London zoo for 22 years, was recently sentenced to die a military death, and was formally shot.

For six months he steadily refused to take a bath, although, when in his prime, scrupulous attention to his appearance was one of his many pleasing characteristics.

The reason for Sam's loss of interest in life is domestic. For 19 of his 24 years he was the happy husband of a wife even more famous than himself. She died and efforts to find Sam a new wife failed.

Lizzie, three years old and decidedly fatter in her ways, was introduced, but Sam resisted all her charms, treating her with rude coolness until one day Lizzie angered him beyond endurance and he ducked her in the pool and sat on her head. That ended Lizzie's career as Sam's wife, and nearly ended Lizzie's life.

Respect For Law
If Chicago has thirteen fines as many municipalities all over Canada can not plead the "poor country" excuse. The fact is that English law and the spirit of English law-abidness work wonderfully in the newest countries on earth.—Brooklyn Eagle.

English Oaks Becoming Rare
Not Good For Use Until Tree is 400 Years Old

England's famed oaks are disappearing. Many oaks were cut-down during the war, as the wood was urgently needed. Said a botanist, "The wood of an oak is not really any good until the tree is 400 years old, and people today cannot afford to grow oaks for posterity. Originally large parks of England were covered with oaks. The trees are almost a rarity now in some places. It is said that an oak takes 400 years to grow to full size, is mature for another 400 years, and takes 400 years more to decay. In some cases, I should say this is true."

CAPO POLISH FOR Every Purpose

COULD NOT SLEEP NIGHTS

Pains and Headaches Relieved by Taking Lydia E. Pinkham's Vegetable Compound

Dublin, Ontario.—"I was weak and irregular, with pains and headaches, and could not sleep. I heard about Lydia E. Pinkham's Vegetable Compound by reading the letters in the newspapers, and tried it. I became wanted to get better. I have got good results from it. I feel a lot stronger and am now regular with my headaches as I used to be and am now regular. I am glad to tell my friends what kind of medicine I am taking. You may see my letter at a hotel to others. Mrs. JAMES RACHO, Box 12, Dublin, Ontario.

Halifax Nurse Recommends
Halifax, N.S.—"I am a maternity nurse and have recommended Lydia E. Pinkham's Vegetable Compound to many women who were children, and to women who need a good tonic. I am English and my husband is American, and he told me of Lydia E. Pinkham's Compound in England. I would appreciate a copy or two of your little book on women's ailments. I will write you soon. I am glad to tell my friends what kind of medicine I am taking. You may see my letter at a hotel to others. Mrs. JAMES RACHO, Box 12, Dublin, Ontario.

DEPARTMENT OF EDUCATION WEAK

The Blairmore school case shows weakness on the part of the department of education. In Blairmore the schools are closed, although the teachers are ready to teach, and are being paid for teaching. The children are running about the streets. The population is sharply divided on the school issue, which is a deplorable condition of affairs in any community. If the department would use some strength, and vigor, the trouble would not have occurred—Calgary Alberta.

According to the school ordinance the district school inspector is the individual who should be on the ground to enquire into the trouble at Blairmore. He should be the representative of the Department of Education and the official through whom the department should receive their first-hand information, not from the chairman, secretary or any member of the school board.

SCOUTS' DANCE A SUCCESS

Much praise is due to Scoutmaster Charles Murray, of the Landed Boy Scouts, for the enjoyable and well-organized dance held in the Tugan hall, Cowley, on the evening of Friday, September 7th.

A large crowd was present in spite of the unfavorable weather, which testified to the esteem in which the local scout movement is held by the citizens of the district.

For training in manliness and uprightness for the boy of the day there is nothing to equal this world-wide organization, which was started in Great Britain by Sir Baden Powell and has spread throughout the entire Empire. Any locality may be justly proud of having a troop of boy scouts organized in its midst, and the ready support of all citizens should be forthcoming in assisting in the development of the qualities of citizenship and loyalty which this training is intended to stress.

Scoutmaster Murray and his assistant officers have worked indefatigably since the organizing of the Landed troop last spring, giving faithfully of their time and labor in training the boys and in raising funds to provide scout uniforms and to carry on their organization work, and they are to be heartily congratulated on their successful endeavors.

The music of the dance, furnished by the Ladies' Imperial Orchestra, of Calgary, was superb and enjoyed by dancers and listeners. The supper provided under the direction of Miss May Bennett, president of the Landed Girls' Club, was bountiful and most excellent.

The good wishes of the people are with the girls and boys that they may successfully carry on.

FERNIE TO HAVE SMALL

IRON AND STEEL INDUSTRY

W. R. Wilson, president and managing director of the Crows' Nest Pass Coal Co., has interested British capitalists in a project to establish a small iron and steel plant at Fernie, B.C., using coal from Crows' Nest and hematite from Iron Mountain, which is ten miles east of Creston, on the Canadian Pacific Railway.

As a preliminary toward this project, the group of claims owned by C. P. Hill and associates will be thoroughly explored by diamond drilling. What promises to be extensive deposits of high-grade hematite, low in phosphorus, have been uncovered at several points.

BLAIRMORE SCHOOL CLOSED;

CHILDREN ON THE STREET

The following article by a Blairmore correspondent appeared in yesterday's issue of the Calgary Alberta:

BLAIRMORE, Sept. 9.—The Blairmore schools are closed and no person seems to have any idea when they will be opened. The board is paying the wages of the teachers who are still employed but who have received notice of dismissal. The teachers are on hand ready to carry out their part of the contract. The children are running about the streets. The parents, for the most part, want the school opened, and the department of education is taking no action.

That is the condition of affairs in this Pass town. The citizens, who have held a number of meetings, have given some plain evidence of disapproval of the action of the school board.

The school board, some time during the summer, reduced the wages of the staff, and later on dismissed all of them. Some technically was neglected and it was discovered that the notices would not be effective until well on in this month, some on September 8 and others not until September 15 and others still later. The teachers insist that the action of the board even yet is not regular, but the board itself admits that the teachers are employed until the middle of the month.

The board then applied to the department of education asking permission for the school board to extend the summer vacation, which closed on September 1, to September 8. The department gave a sort of Delphic oracle reply, asserting that it was against the law to do anything like that, but if the board found it impractical to open the schools, probably the department would sanction the action.

That was the application for extension to September 8. The board produced the answer, interpreting it as a sanction of the department for keeping the schools closed.

But now September 7 has passed and gone and the schools are still closed. The board, it is reported, has asked for a further extension of the vacation, but has produced no documentary evidence respecting the reply of the department.

J. A. Barnett, secretary of the Teachers' Alliance of the province, is in Blairmore in the interests of the teachers, and has spoken to a public meeting of the citizens. The people seem to be with the teachers.

In the meantime, there is no school and the school board is continuing to pay the teachers. The question is what will be the next move?

Drumheller schools are so over-provided that classes are operating in several halls and churches.

JASPER NATIONAL PARK

A couple of weeks ago we had the pleasure of spending a week at Jasper National Park, one of the most beautiful spots and holiday resorts on the American continent.

Jasper National Park covers an area of some 4440 square miles, being twice the size of the province of Prince Edward Island and almost as large as the State of Connecticut.

Three miles from the Canadian National Railway depot stands Jasper Park Lodge, owned and operated by the Canadian National Railways, one of the most unique rustic and home-like structures to be found in the world. The Lodge is beautifully located on the shore of Lac Beauvert, and has accommodation for upwards of 350 guests. A beautiful motor road, surfaced with the famous Athabasca tar sands, connects the lodge with the depot.

The main building is a model of rustic architecture, built entirely of peeled logs and native boulders and is really the largest log building on the continent. Fronting on the lake is a large lounge with open fireplace where logs of any size and to a length of eight or nine feet may be thrown in and cast pleasure through flickering sparks and flames. Large dining room, barber shop, ticket and telegraph offices are operated within the building. Spacious verandahs overlook the lake and swimming pool. Log cabins of various sizes, each comfortably furnished and equipped, even to the extent of bath and hot and cold water are located on the grounds, all forming a picturesque little town that at night time is a sight when lighted artificially.

Golf, tennis, boating, swimming, fishing, hiking, mountain climbing by auto, saddle horse or foot, and motor- ing are open to those who spend a vacation there. Miles and miles of gravelled, or filled motor roads and pack trails radiate from the lodge to points of exceptional interest. One point of particular interest is Mount Edith Cavell, which is reached by the Mount Edith Cavell drive, a distance of eighteen miles by motor. From here one follows a good trail right to the Cavell glaciers, a distance of about a mile and a half. The climb by motor, scaling the slopes of Mal- igne mountain, brings one to a height of some four thousand feet above the town of Jasper, or 7400 feet above sea level.

Along the Edith Cavell trail one frequently sees black bear roaming across the road or along the hillsides, quite uninterested in anything but the berries they are after. Once in a while cars have to stop to allow

these animals to get out of the way. Another point of particular interest is the Maligne canyon, easily reached by six miles of good road from the lodge. This canyon is a natural phenomenon and a walk from the first falls at the end of the motor trail to a distance of a half a mile reveals a gorge almost 200 feet deep and ranging from 5 to 30 feet wide, which has been cut out of the solid rock by millions of years' flow of a small stream.

There are many other drives the visitor can take and enjoy the beautiful scenery along the winding Mal- igne and Athabasca rivers, which course through the snow and ice- capped mountains of Yellowstone Park.

Tourists from all parts of the world have visited Jasper this season and all speak favorably of this beau- ty spot of nature.

MOUNTED POLICE MONUMENT TO BE ERECTED AT MACLEOD

The Macleod town council has recently received a communication from the commissioner of national parks, who is an official of the Department of Interior, advising that the department is interested in the preservation, restoration and marking of historic sites of national im- portance, and that an advisory board of recognized historians has been appointed to act in an advisory capacity to the department in this work.

The site of Fort Macleod has been considered of sufficient national im- portance to receive consideration by the department by the erection of a tablet or cairn or boulder to com- memorate the advent of the North west Mounted Police into the north west territories and the building of the first fort at this site.

Sample photographs of the monu- ment to be selected have been sent forward and the board of trade has agreed to meet the town council, and together they will select the kind of monument to be erected, as well as its exact location.

FEDERAL ELECTIONS ON OCTOBER 29TH

Nominations for the Canadian fed- eral elections will be held on Thurs- day, October 22nd, and polling on Thursday, October 29th, according to announcement made officially from Ottawa last week end.

Rastus was sporting a new shirt when a friend asked: "How many yards does it take for a shirt like that?" Rastus replied: "I got three shirts like dis out o' one yard las' night!"

THE HOME BANK OF CANADA Payment to Creditors

Pursuant to the provisions of The Home Bank Creditors' Relief Act, 1925, passed at the last session of the Parliament of Canada, a payment of thirty-five cents on the dollar will be made to creditors for money on de- posit or in current account whose de- posits did not exceed \$5000 on the 17th day of August, 1925, the date on which the said Home Bank suspended payment, who have proved their claims with the undersigned and who are not otherwise debarred under the provisions of the said Act.

Creditors for money on deposit or in current account entitled to partici- pate in this distribution includes holders of bills of exchange issued by the Home Bank of Canada and outstanding, holders of cheques drawn upon the Bank, certified by the Bank, and outstanding at the date the Bank suspended payment, and persons entitled to moneys col- lected by the Bank as agent prior to suspension and not paid over.

Under the provisions of the said Act the following parties are de- barred from participating in any dis- tribution of funds therein provided: (a) Any person or government en- titled to a charge upon the assets of the Bank under Section 131 of The Bank Act, or

(b) Any bank or banking cor- poration whether in Canada or else- where;

(c) Any person who is or has been a director of a bank, or his estate, or any company in which he is or has been a shareholder, or any firm of which he is or has been a member; or

(d) The Government of any province, or to any city, town, county, municipality, parish, school board, educational institution, local im- provement district, telephone dis- trict, or other similar corporation or institution; or

(e) Any corporation, association, society, partnership, club, friendly or mutual benefit society, religious or church corporation, labor association, or any such society, organization or association whatsoever; or

(f) Any Senator or Member of the House of Commons of Canada.

Any questions arising under the section of the Act in which the above parties are specifically named shall be determined by the Commis- sioner appointed under the said Act.

Depositors and creditors at the Home Bank of Canada are hereby notified that they may obtain payment of the amounts to which they are respec- tively entitled on application by them at the Blaimore Branch of The Home Bank of Canada, Blaimore, Alberta, on and after the 2nd day of September, 1925.

Any depositor or creditor failing to take advantage of the provisions of this Act on or before the 27th day of June, 1926, is absolutely barred from receiving any benefits therefrom.

Creditors who have not yet proved their claims are requested to do so without further delay and have their names added to the list for payment.

G. T. CLARKSON,
L. E. WELDON,
Liquidators, The Home Bank of Canada.
Toronto, August 28th, 1925. [s10-17]

DAD

Dad is growing old and weary and there's silver in his hair, and his eyes are always solemn, he has seen so much of care.

He has seen so much of sorrow, he has known so much of tears, he has borne the heat and burden of so many bitter years!

Dad's already in the twilight of life's little fleeting day, and perhaps we'll often ponder, when his load is laid away, on the steps we might have saved him when his feet and hands were sore, on the joy we might have given to the heart that beats no more.

We'll recall a hundred errands that we might have gladly run, and a hun- dred kindly actions that a wight had he labored, while the boys were all at play, when the darkness hides him from us at the closing of the day.

—Walt Mason.

A hotel guest, attired in his dress- ing gown, waylaid the chambermaid in the corridor. "I say," he com- plained, "the lock of the bathroom door is out of order. Beastly awk- ward, you know!"

The girl grinned. "Bless you, sir," she said, "you'll just have to do the same as the others, sing!"

Suing for separation, alimony and counsel fees, Mrs. Ida Kissel, of New York, sets forth that her husband is a bootlegger with an income of \$700 a week.

Good For Nothing
"Now Tommy," said Mrs. Bull, "I want you to be good while I'm out." "I'll be good for a nickel," answered Tommy.

"Now Tommy," replied his mother, "you can never be a real son of mine unless you are good for nothing."

MARK DRUMM MOVES

TO CALEXICO

The following clipping from the Yuma, Arizona, Morning Sun, would be of local interest. Mr. Drumm was up to 1910 or 1911 editor and prop- rietor of The Frank Paper, at Frank, later published by The Blaimore En- terprise:

"Mark Drumm, who has filled the position of advertising manager on the Morning Sun for the past thir- teen months, has severed his con- nection with The Sun and is going to Calexico, where he becomes adver- tising manager on the Calexico Chron- icle.

"Mr. Drumm has been a faithful, loyal and hard-working employee of the staff of The Morning Sun and has made many friends in Yuma.

"He will be missed in The Morning Sun office and on the streets of Yuma.

"The best wishes of The Sun man- agement go with him to his new field of work."

A girl who had moved to a new town decided to go to church on her first Sunday in the place. At the end of the service the young minister hastened to greet her and welcome her into his fold. "I shall be glad to call upon you next week," he said in farewell.

"Don't trouble, please," was the polite reply; "I have a young man."

"And so, Jim, your old aunt has passed on," I said to a chap once. "What was the complaint?"

"No complaint," said Jim. "No complaint whatever. She left us all a little sadder."

EARLY RAILROAD TRAVEL AND THIRTY-SIX HOURS TO EUROPE

When the first French railroad train left Paris for Versailles many years ago, the train was wrecked and many passengers killed. "That's an end of foolish railroad travel," said the pessimist.

The French railroad company hired a troupe of actors and actresses to fill the coaches of the next train. They sat smiling through the win- dows, as though they liked it, and railroad travel was soon re-establish- ed.

The English will not let any air- plane disaster interfere with their in- teresting plan for a regular air line across the Atlantic. Professor Sim- mons describes the proposed machine to the British scientific Association as follows:

"An all-metal monoplane, wings spreading out 220 feet, with 60,000 square feet wing area (equal to thirty city lots), 3000 horse power units built into the metal wings, double- decked hull, to carry 100 passengers."

This machine will cross the Atlan- tic in thirty-six hours, making one stop at the Azores.—Vancouver Sun.

There was a young woman named Stella,
Fell in love with a bow-legged fella.

This bow-legged chap
Let her sit on his lap,
And she fell right through to the cells.

The Rotary district conference for western Canada district will be held next year at Banff, according to the decision of the conference at Kenora the past week.

WHY SCHOOL TEACHERS GO CRAZY

Question—"What are Glaciers?"

Answer—"Guys who fix windows when they are broken."

Q—"What is a peninsula?"

A—"A bird that lives on icebergs."

Q—"What is a volcano?"

A—"A mountain with a hole in the top. If you look down you can see the creator smoking."

Q—"Why does a dog hang out its tongue when running?"

A—"To balance its tail."

Q—"What is steel wool?"

A—"The fleece of a hydraulic ram."

Q—"What is the capital of Ontar- io?"

A—"O."

Q—"What are the Christian na- tions?"

A—"Those that use cuss words."

Q—"What is etiquette?"

A—"Saying 'No, thank you' when you mean 'Gimme'."

Q—"What is an idiom?"

A—"A woman idiot."

—En-ar-co Oil News.

Miss Mary Kroli and Miss Benven- uta Pozzi have both secured schools, the former at a rural school five miles west of Brockton, and the later north of Lundbreck. Both are recent graduates from normal.

A local option vote in the Langdon-Shepard district, taken on Tuesday, went against local option by a small margin.

Mr. W. H. Chappell returned Monday morning from Calgary, where last week end he attended the Masonic Grand Lodge session.

Attorney-General Manson, of British Columbia, was a speaker at the Masonic Grand Lodge session and reception at Calgary on Saturday last.

Ambling Along With the Trail Riders

(1) Chief Buffalo Child Long Lance. (2) Lunch on the Wolverine Plateau. (3) One of the Guides. (4) On the Wolverine Plateau with Tumbling Glacier in the background. (5) Chief Louis Arbel with his Kootenay Indians.

The Official Ride of the Trail Riders of the Canadian Rockies, commenced this year on the morning of August 8th and ended at Wapta Camp on the night of the tenth. Over a hundred members participated. They rode across country between Marble Canyon, on the Banff-Windermere Highway, to the Bungalow Camp at Lake Wapta.

The Riders, among them a number of prominent society people, scientists and artists, all travelling on horse-back, blazed a new passage across the Wolverine Plateau. Six countries were represented: Canada, the United States, Australia, France, the West Indies and England. The artists, of whom there were six, made sketches of the "Irish scenery along the route of the newly discovered trail.

Seven Indians were in the party, six being Kootenays under Chief Louis Arbel, while the seventh was Chief Buffalo Child Long Lance who gave a lecture on the Indian Races of Canada to the Canadian Club of Montreal during the winter, and is rapidly becoming famous as an authority upon Indian affairs.

The artists included Leonard Richmond, R.B.A., and A. L. Leighton of England; Carl Rungius, Belmont Browne and Richard M. Kimbel, of New York, and R. Falenski of Chicago. Paris was represented by the Duc de Nemours, who recently purchased a ranch near Calgary.

This was the second annual Ride and Pow-wow of the organization. On the morning of August the eighth, motor cars conveyed the Riders from

Lake Louise and Banff to the point of departure on the Banff-Windermere Highway. There guides and horses were in readiness and the party immediately mounted and the Ride commenced. The trail led up Tumbling Creek, past Tumbling Glacier and on the Wolverine Plateau where lunch was served.

The ride then proceeded along the Plateau with the Wolverine Plateau, Mount Helmet and the Washmawapta Icefield and Waterfalls on the left, giving the riders a view of the Ten Peaks on the right. That night camp was pitched on the Goodair Plateau and before retiring the campers gathered around the fire for the usual sing-song, in the shadow of the cliff which rises sheer six thousand, five hundred feet above the valley.

On the second day the ride led down to Goodair Creek and up McArthur Creek, past Lake McArthur. That night was spent at the shores of Lake O'Hara, the camp there being placed at the disposal of the Trail Riders by the Alpine Club of Canada. The day ended again with a sing-song.

On the third day, August 10th, the final ride was made from Lake O'Hara to Wapta Lake, where the expedition was concluded with a Pow-wow, sing-song and pale-face dance at Tipi Camp. It is expected that another ride of a similar nature will take place next year as the undertaking impressed those who took part as one of the most enjoyable outings they have experienced. Not only does the Ride provide an uncommonly pleasant holiday for sportsmen from Canada and the United States, but it also serves the excellent purpose of making the scenery and the fishing and hunting facilities of the Rockies known abroad.

ROSE COFFEE is good coffee

The Cow Behind The Wagon

Doleful things are said and written these days about the present generation of youths and maidens, and sharp contrasts to their disadvantages are drawn with their parents and grandfathers. We hear and read much to the effect that the young men and women of this age are going to the dogs; that they lack the morals, the stamina, the strength of character of previous generations. Much the same kind of thing was said of mankind in general prior to the Great War—that the race had lost its virility, its power of endurance, its courage and willingness to sacrifice and suffer. But the war demonstrated the falsity of such statements.

None the less it is true that we have lost some of the things that made our fathers and mothers the salt of the earth. In recent years we have heard a good deal about hard times, but contrasted with what the early pioneers of this country had to endure, these years were times of plenty and ease.

The world progresses and it is only right and what should be that succeeding generations should not be called upon to undergo the trials and struggles of bygone days. But our modern civilization, with all its manifold comforts and conveniences, has caused the young men and women of today to expect too much for what they are willing to give; to assume the attitude that the world owes them a living and that they are going to collect it in the easiest and quickest possible way.

Our attention was recently directed to a little local item appearing in a United States paper about a couple that was taking a deferred honeymoon, a honeymoon that took place twenty-five years after marriage. In that item it was stated that this couple, which has achieved a substantial success in the quarter century since marriage, had taken the original wedding trip in a lumber wagon with a cow behind the wagon, a gift of the bride's parents to the happy and hopeful couple.

This little reminder of a quarter century ago struck a popular chord in many memories, for within ten days after the article appeared not less than ten people dropped in at the newspaper office to tell the editor that they, too, had led a cow home behind the wagon after the wedding ceremony; and that their only wedding journey was from the home of the bride to the new home where the couple was to start housekeeping. Most of those who came in were people to whom the years have given good things, many of them being able to buy cows today by the herd. If they wanted the critters. All of them gave credit for their success to their willingness to start with little and work hard for advancement.

The cow behind the wagon, says this newspaper, is a symbol of a generation of real workers, men and women who faced the world with little but with earnest ambition, willing to give for what they wanted. Armed with youth, determination, health and strength, the world was theirs for the taking.

The pioneers of fifty, even twenty-five years ago, first required a home. But the ambition of a large percentage of young people today is to own an automobile, whether they have a home or not. They will mortgage the future for present gratification. Forgetful, or perhaps ignorant, that it is not the original cost but the upkeep, they blithely sign a bunch of promises to pay, fill up the tank with gas and are off. Off to where?

Despite all the talk of hard times, there are more advantages for the ordinary man and woman today than there have been before, but the man and woman who wish to attain success must be prepared to pay the same price as our fathers and mothers and those before them paid—they must give before they get.

Word, hard work, and lots of it is one of the fine things life has to offer. There is nothing quite so satisfying as to begin at the bottom and climb, to start with little and accumulate for yourself. The boy or girl who does not have to strive for themselves, but who have everything done for them by their parents, are not the really fortunate ones, as we are sometimes led to believe. The young couple starting out in life where their parents left off miss the joy of achievement which their fathers and mothers experienced, and they never know that close and sympathetic comradeship which is realized by those who plan and work together shoulder to shoulder.

After Many Years

French and Belgian Troops Turn Ruth Over to Germans

The French and Belgian troops have turned over the Ruhr to the Germans after four years' occupation, undertaken to compel Germany to pay reparations. There were no disturbances, no demonstrations, no public expression of either regret or pleasure. There were, however, many emotional partings between young French soldiers and their German sweethearts.

Waiting impatiently outside the city, 1,500 security police were assembled to take over the general policing.

The allied army marched out with bands playing.

Mrs. Dumb (who has just received her C. O. D. package from the butcher shop)—"Here, take these codfish right back. I ordered herrings."

Sometimes people don't mind their own business because they haven't any mind.

Danger From Yellow Races

Is Economic Rather Than Military

Says Dean Inge

Dean Inge, who recently visited Canada, thinks the danger to the white races will come, not from the black nor from the red races, but from the yellow and the brown—the Japanese, the Chinese, and the Indians. He believes that for a long time to come the danger will not be of a military but of an economic character. The question was how the high standard European and American was to cope with the cheap labor, perhaps directed by white capital, of the Asiatic races.

Furs Bring Good Prices

Weasel and lynx brought good prices at the recent fur auctions at Winnipeg, and the demand for fox has not been very keen. The offering of silver fox was said not to be of the best quality. Better grades of skins were in fair demand. About 75 buyers, a number from the United States, were present.

Rapid Fire Gun Disappears

Failed to Arrive at French Station and Cannot Be Found

Mystery surrounds the disappearance of a newly invented rapid fire gun, built on lines of the Lewis gun, from which great things had been hoped for. The weapon disappeared from the railroad depot at Brive in Gallarde, France, while in transit.

The gun, which is the invention of the workman of a Tulle arms factory, was being shipped to a proving ground, for trial before a parliamentary commission prior to its adoption by the army. It failed to arrive and a factory was started. It was traced to Brive in Gallarde, where the box in which it had been packed was found to have been opened. Parts of the gun were scattered about the depot. It is not known whether the parts were assembled to be kept in the interest of some foreign power or whether the breaking open of the box was due to carelessness by railway employees.

Home Not Complete

Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most homes, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

Trying New Experiment

Boys in London Orphanage Educated As Individuals

In this day of specialization it is interesting to read of a novel experiment in education which is being tried, so far with signal success, by one of the orphanages of London. Each boy is treated as an individual, and a separate timetable is drawn up for his benefit. Close work is in this way abolished altogether. A boy is encouraged to specialize in the particular branch for which he is fitted, and the confident hope is expressed that in this way those whom the institution has out into the world will be found specially equipped for the reaction in life they are to follow.

TONIC TREATMENT

FOR INDIGESTION

The Surest Way to Relieve Stomach Trouble Is Through Dr. Williams' Pink Pills

When the stomach is feeble and food lies in it undigested, the poisonous gases distend the walls of the stomach and cause a serious interference with the other organs, especially with the action of the heart and lungs. These poisonous gases have other ill effects. They are absorbed by the blood and so weaken and corrupt it as to cause sores in various parts of the body and the formation of unhealthy tissue everywhere. Experience shows that these troubles vanish just as soon as the stomach is made strong enough to digest the food. In other words, it needs a tonic that will enable it to do the work of changing the food into nourishment. The tonic used ought to be one that will agree with the most delicate stomach and this is exactly what Dr. Williams' Pink Pills do.

Here is a bit of convincing proof given by Mrs. Chas. Langner, Ellerslie, E. C. I., who says: "For some years I was a sufferer from stomach trouble. Everything I ate caused distress, sour stomach and belching. I could not eat meat or potatoes, and I grew weak and very nervous. No medicine seemed to help me until I purchased a box of Dr. Williams' Pink Pills, and these simply worked wonders. I took the pills faithfully for a couple of months, by which time every symptom of the trouble had disappeared, and there has not since been the slightest symptom of stomach trouble. No wonder I praise Dr. Williams' Pink Pills."

You can get these pills from any medicine dealer, or by mail for 50 cents, a box from Dr. Williams' Medicine Co., Brockville, Ont.

Peanuts and Almonds

Mr. Jack Prout, an enterprising young farmer near Portage la Prairie, has made a venture this year by attempting to grow peanuts and almonds. So far he has succeeded, and expects to have a satisfactory crop. Although he sowed his initial crop last year with good results, he embarked on a larger scale this season, and hopes it may prove a remunerative investment.

Invents New Method of Weaving

Cutting of cotton imports into Germany by half may result from a new method of weaving cloth with hemp, invented by the German textile expert, Dr. Gindler. The hemp, it is expected, will replace in part the cotton formerly used in the cloth. There are about 1,000,000 acres of meadow in Germany adapted to the raising of hemp.

There are now twenty women holding seats in the national parliament of Finland.

Twins Think in Unison

Brothers in Warsaw Are An Enigma to Scientists

A pair of twins, about 30 years of age, are an enigma to physicians and scientists. The twins appear to think and act in unison. An unexpected thought harbored by one of the twins instantly appears to spring into the mind of the other almost simultaneously. What one desires the other also wants and each and every suggestion by one is accepted at once by the other. Said to have been at one time wealthy, the two brothers have for some time been in poverty and around their home near Warsaw. Pride apparently prevented them asking for aid and they are said to have entered a suicide pact. Wrappings heavy for collected coats about themselves, the twins lay down in a chicken coop to die. After being in the coop for several days they were found half starved.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kollig's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Strange Marine Creatures

Angler Reports That Weird Reptiles Sejourn in Okanagan Lake

Long-necked, rough skinned creatures who waddled across the surface of the earth long before men, monkeys and evolution was heard of, are living in the depths of the Okanagan in the southern interior of British Columbia. It was reported to John P. Babcock, deputy commissioner of fisheries, by an angler of this district.

He is preparing to go forth and do battle with the monsters who live unknown in the lake bottom. Armed with a rifle, he plans to shoot one of the creatures and take it ashore. Mr. Babcock's theory that big sturgeon, and not aspens, are causing the destruction in the Okanagan district, are treated with silent contempt by the men who claim to have seen the terrifying visitors.

British Coal Exports Increase

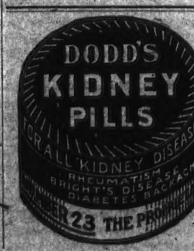

A statement of the coal division of the department of commerce on the British coal situation, sent by radio from London, points out that while British coal exports fell off in the first seven months of the year, the export of 319,000 tons to Canada in the seven-month period represented a big increase. The British coal industry is said to be slowly resuming operations after the labor crisis.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Distinguishing Marks Necessary

There are so many people named Smith in England, that a symbol known as the monogram, has been devised to distinguish them. There are a total of 530,000 Smiths in Britain. Of these 20,000 are J. Smith, 41,000 John Smith, 30,000 John W. Smith and 5,000 John William Smith.

Marriage is the end of all man's troubles—one end or the other.

SUNDAY SCHOOL LESSON

SEPTEMBER 15

PAUL IN THESSALONICA AND BOREA

Golden Text: Prove all things; hold fast that which is good. Thessalonians 5:21.
Lesson: Acts 17:1-12.
Devotional Reading: 1 Thessalonians 5:1-11.

The Text Explained and Illumined
Paul, preaching in Thessalonica, was met by his friends, and his companions went by way of the cities of Amphipolis and Apollonia to Thessalonica. Here at Thessalonica, they remained several months, as we know from Paul's letters to the Thessalonians. Paul speaks only of his preaching in the synagogue for three successive Sabbaths. Luke says he "reasoned with the Jews, and the Greeks, and the Romans, and the people of the city." He then showed that Jesus fulfilled these prophecies, and thus reasoned, or argued, that Jesus is the Christ. Christ explains Paul's reasoning by saying: "The Jews were like little children who had a tree in their garden, their father's vineyard, and they gathered the nuts as they grew, and laid them up with reverence in a store house; but they knew not how to break open the shell and so get the meat out of the nuts. Paul broke the shell, opened the kernel, and presented it as food to the hungry."

A Power of Its Own.—Dr. Thomas Edison's oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable thing in their possession. Its uses are innumerable and for many years it has been praised as the leading liniment for man and beast.

The End Of Material Things

Says Elder May Not Last More Than A Hundred Million Years

"The earth may not last more than another hundred million years, but man will live forever," declared Sir Oliver Lodge in an address in England. The spirit of man is the only lasting thing in a universe of change, according to the eminent scientist, who said that nothing goes out of existence except material things. "Mighty forces, of which we have no conception, are going on in space, and our scientific thinking, which is the universe which will outlast the earth. When this earth is disintegrated into its component parts that force will be at work still, creating universes of a magnitude incomprehensible to the finite mind of man."

Canada Sells Gold Notes

Redeemable at Option of Government

On March 1, 1926
The Canadian Government has sold to the Chase Securities Corporation, and Blair and Company, Inc. New York, \$70,000,000 of one-year four per cent treasury gold notes due September 1, 1926, the proceeds of which are to be used in connection with the settlement of one-year notes amounting to \$50,000,000 maturing September 1, 1926.

The balance of \$20,000,000, it is announced, will be paid out of cash on hand.

Notes are Redeemable at the Option of the Government on March 1, 1926, and thereafter at par and accrued interest on 30 days pay notice.

Entitled to First Prize

Six hundred and twenty-two pounds of proud womanhood won the first prize in the annual fat women's contest at Coney Island, New York, capturing the honors from 157 other contestants. Possessor of the winning poundage is Miss Della Marie Jensen, 22 year old of Jersey City. Enroute to the contest she broke the springs of two taxicabs and because so thoroughly lodged in the door of another that 90 minutes were required to extricate her.

Miller's Worm Powders prove their value. They do not cause any violent disturbance in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is impossible. Yet they are thorough, and from the first dose there is improvement in the condition of the system and a cessation of manifestations of internal trouble.

New Liquid Motor Fuel

A new liquid motor fuel called carbanol, invented by Makhadmah, a Russian, is said to have given ten to fifteen per cent higher efficiency than benzine when tested by the French navy.

Buenos Aires Wakes Up

The crossword puzzle craze, unknown to the general public a few weeks ago, has struck Buenos Aires and is spreading rapidly into the interior.

Performing Gold Fish

Two gold fish are the stars of a show at Birmingham, England. In a large bowl they perform all kinds of tricks. Their stunts have been a success at 150 performances.

Keep Minard's Liniment in the House

1/2 lb Package

Flying Into Matrimony

Swedish Couple Had Ceremony Performed On Board Aeroplane

A young Swedish couple were recently married while flying through the air on board an aeroplane. When the machine, carrying a full complement of passengers, had risen to a height of 1,500 ft., an altar was erected in the cabin, before which a Swedish clergyman performed the marriage ceremony, with a lawyer and his wife as witnesses. A wedding breakfast was then served, and the bride and groom drank in champagne by the passengers. The clergyman and the lawyer left the machine at Hamburg, but the couple continued their honeymoon trip to Amsterdam.

Children Cry for

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

RED INFLUENCE IS BLAMED FOR SEAMEN'S STRIKE

Montreal.—Behind the world-wide disturbances in British shipping is "red" influence, asserted J. Havelock Wilson, president of the British Seamen's Union. However, the machinations of the Communists are falling and will continue to fall, he added. As proof of the weakness of the strike, Mr. Wilson pointed to the sailing of the *Majestic* from Southampton, on schedule, and the progress towards normal operation made by other ships in British ports.

False news credited by Communists to Australia had precipitated the seamen's strike, he said. Mr. Wilson in Britain, the "Reds" had taken advantage of a reduction in pay to try to bolster up their own "lying organization," and had worked on the feelings of the seaborne workers.

"The British seamen, who carried Britain through the war, will carry her through the peace as well," said Mr. Wilson, pointing to the fact that no large liner had yet been prevented sailing out of a British port through the present so-called strike.

"The trouble will all be over soon," he added, and prophesied a warm time for the agitators when the seamen who have heeded them find they have been misled. "I don't know what promises the Reds have made as regards strike money, but if they have promised any, they will have to deliver the goods or run for their lives."

The 100,000 members of his union, he said, would live up their contract and stick to their jobs.

Noted Scientist Dies In Africa

Professor Custer, of Manitoba University, Victim of Malaria.

Winnipeg.—Stricken with malaria fever, Prof. W. E. Custer, of the University of Manitoba, who was leading a scientific expedition party in Africa in search of the bones of a huge dinosaur, died Sept. 2, according to advices received here.

Professor Custer, assistant in the department of geology at the University of Manitoba, left Winnipeg January 20, 1916, to head the British Museum's party of explorers to Africa. He was considered one of the best authorities on Western Canadian geological history, and under the auspices of the University of Manitoba, had made extensive surveys of the geology of the solid rock in both Manitoba and Saskatchewan.

He had discovered many relics of the day before the first white man set foot in the prairie country, and it had been his intention to compile a history of the natural formations of the country.

Prof. Custer was born in London, Eng., 42 years ago. He was unmarried.

Investigating Canton Embargo

Vancouver.—The Canton embargo against British vessels is receiving the serious attention of the British and Canadian Governments and other governments affected, according to a telegram received by the Vancouver Merchants Exchange and the board of trade, from Right Hon. W. L. Mackenzie King, in reply to messages sent to the premier on August 20.

Want Full Civil Rights

Edmonton.—Full civil and political rights, as enjoyed by other citizens, as well as the abolition of monetary fines for mistakes made by civil servants, were demanded in a number of resolutions passed at the annual convention of the Amalgamated Civil Servants of Canada.

Would Join Germany

Yuma.—Three thousand persons attended a meeting in the city hall to express a desire to favor of Austria being attached to Germany. President Loeb, of the Reichstag, recently came from Germany with a committee of German desirous of the union of the two countries.

Darrow Through With Law

Clarendon, Kas.—Clarence Darrow, here to discuss publication of his book with R. H. Halden, a judge, returned today he is through with the practice of law and that he looks forward to work as a writer.

Manitoba Gold Discovery

Winnipeg.—An immense vein of free-milling gold quartz has been discovered in the vicinity of Hole River, Man., about 100 miles from here, according to Joseph Steiner, miner and prospector, who has arrived here.

Nearly 50,000 Canadian Cattle

were shipped to England during the past season.

W. N. L. 1918

Favor Ban On Narcotics

Trades and Labor Council Would Prohibit Manufacture Except For Medicine

Ottawa.—The trades and labor congress went on record favoring the complete prohibition of the sale and manufacture of alcoholic drugs except for medical purposes.

The motion was the occasion for a brief criticism of the British Government. T. Duck, of Toronto, declared that the British Government was largely responsible for the opium traffic in the world today because of its fostering of the industry in India and should be subject to severe censure.

James MacDonald, Toronto, said if one country moves that another was responsible for the opium trade, it was the British empire. There was no such thing as a British commonwealth of nations, he said.

Bert Morson, Toronto, declared that the British empire alone was not responsible and the immediate and speedy appropriation of the industry would cause Germany and other countries to commence the manufacture of deadly substitutes. Britain was open to criticism to want other nations, and the congress should be on record as opposed to the traffic which was one of the greatest menace to public health.

British Wait Decision On Mosul Boundary

Secretary of Foreign Affairs Says Question Contains War Menace

London.—Austin Chamberlain, British secretary of foreign affairs, has gone to Geneva to attend to the League of Nations council assembly, which is faced with two principal problems: the Mosul question and European security.

The league's decision on the report of the Mosul boundary commission of the British empire, which is the official British view, is being awaited. An evening newspaper, warns of the danger of war over Mosul if the Turks decide to fight Great Britain for possession of Mosul Vilayet, but well-informed circles believe this view to be unfounded and expect a satisfactory settlement at Geneva.

Rome Is Insolvent

Once Ruined World, Cannot Pay Costs Of Administration Now.

Rome.—The Eternal City, which for centuries ruled the world, now even lacks the right to its own administration. Its insolvent financial condition compelled the government to take action and the cabinet decided to adopt the city, so the taxpayers throughout the country would contribute to the support of the capital. Although taxes in Rome have been higher than in any city in Italy, it has been unable to pay the costs of administration. The administration is now under the ministry of the interior, who appoints a governor.

Treaty With Japan

States Japan Ready For Trade Pact With Canada

Victoria.—Bringing with him the information that the Japanese people would welcome a separate reciprocity treaty with Canada, Hon. T. H. Best, new Japanese consul for Western Canada, arrived here on the liner *Alabama* Monday.

Mr. Kawai, said that while Canada had adopted the principles of the Anglo-Japanese treaty, which was ratified only by Great Britain, and not by her dominions, no direct trade treaty existed between Canada and Japan.

Prospectors Return From North

Prince Rupert, B.C.—Returning from a three months' prospecting trip, the first ever conducted by aeroplane in the history of British Columbia mining, Col. J. Scott Williams, of Montreal, accompanied by his mechanic, has arrived here from Telegraph Creek. The machine was brought to Prince Rupert from Three Rivers, Que., for the expedition.

"Dud" Kills French Farmer

Amiens, France.—The "Dud" of the Great War still remains a deadly missile. Jean Roy, a farmer of Bouchevaine, which was under heavy fire by the German army during the period of hostilities, was blown to pieces by a shell which had fallen without exploding and was buried in the earth. He struck it while driving a stake into the ground.

British Teachers Tour Canada

Toronto.—Sixty-five education authorities and members of the teaching profession from the public and secondary schools of Great Britain, who are touring the Dominion under the auspices of the Overseas Education League, have reached here.

Extend Letter Rate To Wider Area

Additional Countries Are Included In Three Cent Postage

Montreal.—The post office weekly bulletin issued from Ottawa on August 29, gives the following international rates to letter postage to North American continent: From the first of September next the domestic letter rate of three cents for the first ounce and two cents additional for each subsequent ounce will be in effect as regards letters mailed in Canada to any part of the North American continent.

The rate already applies to letters for the United States, Mexico and the British West Indies, and as already announced, also comes into effect as regards letters for Newfoundland from the first of September.

Further extension mentioned above, it will apply from the first of September next to the following additional countries: Costa Rica, Cuba, Dominican Republic, Dutch West Indies (Aruba, Bonaire, Curacao, Saba, St. Eustatius, St. Martin), French West Indies (Martinique, Guadeloupe), Guatemala, Haiti, Honduras Republic, Nicaragua, Panama Republic, Salvador and St. Pierre and Miquelon.

NO PLAN WAS MADE TO FORM WESTERN PARTY

Winnipeg.—Nothing was ever said or suggested by me at the inter-provincial progressive convention at Regina, or, for that matter, at any other time or place, making a plea for union of Liberal and Progressive forces in the west," said Hon. T. A. Cresser when interviewed in connection with a story published here. Knowledge of a move to form any such coalition was also denied by Robert Forke, Progressive leader, and Hon. A. B. Hudson, South Winnipeg member.

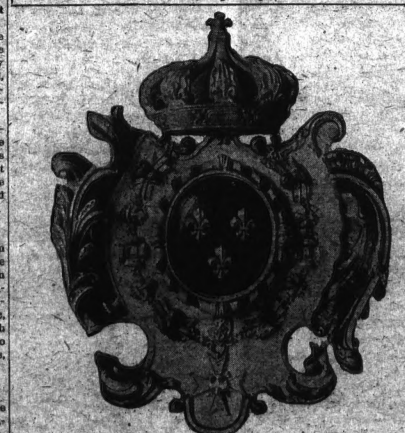

"You may say for me," he said, "that I never heard anything about such a move. When the report credits me with having made a speech at the Regina convention putting forward an explicit plea for union of Progressive and Liberal forces in the west, with the object of making certain, if possible, defeat of the Conservatives, it is absolutely and positively untrue. Far from ever making such a statement, I never even suggested it, directly or indirectly."

"It is a piece of news to me," said Mr. Forke, over the long distance phone. "So far as the Progressives are concerned, no such move has been made."

"We would have nothing to do with any such union," Hon. Mr. Hudson said no one had ever asked his opinion on such a question, and no such idea had ever been suggested to him.

Ancient Escutcheon Back In Quebec

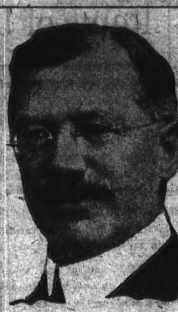

Hon. P. C. Larkin Brings Relic Returned By People Of Hastings, England

The arrival of the White Star-Dominion liner, *Megantic*, which docked at Quebec recently, marked an important event in the history of that city, inasmuch as she carried among her passengers, the Hon. P. C. Larkin, Canadian high commissioner in London, who brought back to this country the ancient escutcheon of King Louis XV. of France. No public ceremony was held, this having been postponed until September 10, to enable some prominent citizens, now away from their homes, to attend.

The historic shield was removed from one of the gates of Quebec in 1759, after the capture of that city by Wolfe, and was taken to England by General Murray. Since that time, this relic of the French regime has been in the possession of the city of Hastings, England, and some time ago negotiations were started with a view to its restoration which resulted in its return. The escutcheon measures four feet high and three feet wide, and is beautifully carved and painted. Mr. Larkin has had constructed a mahogany case for the shield and during its journey across the Atlantic it has been carefully stored in a room specially provided on the *Megantic*.

At Imperial Press Conference

J. H. Woods, Editor and Managing Director of The Calgary Daily Herald.

Imperial Press Conference

Delegates Welcomed to Australia By Premier Bruce

Sydney, Australia.—The Empire Press delegates to the Imperial Press conference at Melbourne, who visited New Zealand on their way to Australia, arrived here after a somewhat stormy voyage from New Zealand. They were welcomed by Premier Bruce of the Australian Commonwealth.

Premier Bruce described the coming Imperial Press conference as the official parliament of the British Commonwealth of nations.

"The fuller knowledge resulting from the interchange of ideas," Premier Bruce said, with reference to the press conference, "will enable the conference to make a valuable contribution to the solution of empire problems. The delegates have at their responsible command potent instruments for moulding and directing public opinion, and have as an audience the whole people of the empire."

Returns to United States

Calgary.—William Sherman, president of District 10 of the United Mine Workers of America, has returned and is returning to the United States. Sherman succeeded his father, F. H. Sherman, in the position four years ago.

Women Want Homesteads

Edmonton, Alta.—A noticeable feature in the mail received by the local office of Dominion lands is the number of women directing inquiries as to available homestead land.

Settle Claims With Mexico

Mexico City.—The foreign office announces that Britain has accepted an invitation extended by Mexico to appoint a claims commission to settle the claims of the respective countries.

Bank Merger Consummated

Five Union Bank Directors Added to Royal Bank Board

Montreal.—In accordance with the agreement sanctioned by the finance minister, the Royal Bank of Canada, at the close of its business on Aug. 31, took over the business and assets of the Union Bank of Canada.

The following directors of the Union Bank have been added to the board of the Royal Bank: W. R. Allan and R. T. Riley, of Winnipeg; Stephen Haas, of Toronto; John H. Price, of Quebec; and W. H. Malkin, of Vancouver.

J. W. Hamilton, former general manager of the Union Bank, has been appointed assistant general manager of the Royal Bank, with headquarters at Winnipeg.

On June 30, the latest date for which figures are available, the principal returns of the combined banks were as follows: Capital and reserve, \$48,800,000; deposits, \$562,228,440; commercial loans, \$12,417,520; total assets, \$735,775,737.

The business of the two banks has been consolidated at 47 points where both banks were represented.

The Royal Bank of Canada will now have 125 branches in Canada and 125 abroad.

Ship Horses To Germany

Trial Shipment of Western Horses for New Market

Montreal.—With a view to finding a suitable market for the light horses of the Canadian west, Jack Byers, Dominion livestock representative in the west, will accompany a shipment of 10 head of western bred horses to Germany.

This shipment which has been assembled in Moose Jaw stockyards, will leave for Boston shortly and will be shipped direct to Hamburg, Germany. The shipment was purchased from the ranchers of Saskatchewan and Alberta by Jack Byers, assistant veterinarian, and Dr. Talbot, Edmonton, provincial veterinarian for Alberta.

This is a trial shipment and the results of the experiment will be watched with interest by Western Canadian ranchers.

MINE WORKERS ARE ASSAILED BY EMPLOYERS

Philadelphia.—Anthracite operators emphasized "the need to foster that a settlement of the suspension shall include measures in avoiding future strikes."

J. W. Inglis, in a statement to this effect, which he made public in Scranton, as chairman of the anthracite operators' scale committee, assailed the action of the mine workers in stopping work because no contract had been negotiated to replace the one which expired.

The following are some facts about the big anthracite strike:

Workers involved, 125,000.

Collieries affected, 272, serving 328 mines.

Companies involved, 135, of which mine control 128 of the largest collieries.

Area affected, 10 counties in North-eastern Pennsylvania covering 500 square miles, practically the only commercial anthracite in the United States.

Maintenance men remaining on duty to preserve property, 8,000 to 10,000.

Loss in wages per day, \$1,500,000.

Loss in daily production, 266,000 tons.

Cause of suspension: Expiration of two-year contract August 31, 1924, and failure to reach new agreement.

Demand of union miners: 10 per cent. increase in tonnage rates; \$1.50 additional for day men; check-off; equalization of day rates; two-year contract; and other features.

Reply of operators: Would not consider demands that increased cost of mining, and suggested that differences be arbitrated.

King Tut Again

Body of Famous Egyptian King to be Exhumed in October

London.—Howard H. Carter, discoverer of Tutankhamen's tomb, announced that the body of the king would be exhumed next October. He said he believed King Tut will be found to have been only 15 or 16 years old. The body will be examined without opening it from the tomb and at a time when there is no curious crowd.

Carter added that he found no connection still plastic and fragrant in a cosmetic jar in the tomb, and experts in London are analyzing them with the hope of detecting for what women cosmetics those used by Egyptians 3,300 years ago.

FREIGHT RATE RULING GREATLY BENEFITS WEST

Vancouver.—The grain trade, and business interests in general, along with those who had carried on an incessant demand for equalization of rates between the prairies and British Columbia, have expressed great satisfaction with the order of the railways commission and approval of early development of industrial and shipping channels of the Canadian Pacific coast ports were made.

The ruling will mean that the rate from Calgary to Vancouver on grain shipments will be 15¢ a bushel, as compared with the present scale of 13.5¢ a bushel. The rate from Calgary to Port William is 15.6¢ a bushel.

G. O. McGee, K.C., who has been counsel for the British Columbia Government in its fight for equalization, predicted that western grain shipments this year should amount to 150,000,000 bushels, and also that Vancouver and her sister Pacific Coast ports henceforth will handle the whole of Alberta's export crop and about half of Saskatchewan's.

Mr. McGee also forecast great manufacturing development for Vancouver and additional elevators and harbor improvements to handle the increased grain movement.

Want Seasonal Rate For Alberta Coal

Government to Consider Question of Special Rate on Shipments

Edmonton.—Premier Greenfield's request to Hon. Mackenzie King for a supplementary order-in-council authorizing a special inquiry into seasonal rates on coal shipments, is to be brought before a government cabinet meeting as soon as the ministers can be got together. Word to this effect has just been received from the prime minister.

In the meantime, Premier Greenfield points out that the press reports from Toronto, in which Premier Ferguson is represented as joining with Alberta in an effort to secure an extension of the time and quantity for this year's trial shipments, are somewhat off the track. His wire to the Ontario Premier was simply a request for co-operation in the appeal to Ottawa to ask for an order directing the railway commission to investigate the question of special rates on trial lot shipments during the summer months, and Mr. Ferguson's acknowledgment indicates that he is understood in this.

For Economic Conference

Presidents of Boards of Trade of Canada to Get Together

Toronto.—The joint call sent out last month by the presidents of Vancouver, Winnipeg, Montreal, Halifax and Toronto to boards of trade and chambers of commerce of the Dominion, suggesting an informal conference of representatives of these organizations, to be held in the early fall, for discussing of economical problems, with a view of devising some plan whereby the commercial interests through the Dominion may more closely co-operate in their solution, has met with a ready response. Advices received by President Gundy, of Toronto board of trade, indicate that every province will be well represented.

Western Stock For Toronto Fair

Montreal.—Christie Bros., ranchers of Maple Creek, have sold 25 head of two-year-old feeder steers of Hereford strain, which will be exhibited at the Canadian National exhibition at Toronto to demonstrate to the eastern feeders the quality of the stock raised in Saskatchewan. The purchase was made by Jack Byers, Dominion livestock representative.

Auto Fatalities In States

Washington.—Three hundred and twenty-eight persons were killed in automobile accidents in a group of 57 cities in the United States during the four weeks ending August 15. They were 417 similar deaths the preceding four weeks.

New Oil Discoveries

Lethbridge, Alta.—Important discoveries are pending in the border oil fields, where the Imperial Oil Company's Dead Horse Coulee well, half a mile from the Rogers Imperial well, is said to be close to Cochrane, has oil at 2,430 feet.

Will Go To Meili

Montreal.—The following are among those appointed as demonstrators in the department of chemistry, McGill University: D. B. Patterson, B.Sc., Calgary; R. P. Sutherland, B.Sc., Vancouver; and C. H. West, B.Sc., Seattle.
